Paper Trading Risk Workbook

IndAI course-project sample material - virtual money only.

1. Begin with virtual capital of INR 100,000.
2. Set the maximum planned loss per trade to 1% of capital.
3. A planned entry of INR 200 and stop of INR 190 risks INR 10 per share.
4. A risk budget of INR 1,000 allows at most 100 shares.
5. Check that the total order value fits available virtual cash.

Exercise

Choose an instrument from the bundled demonstration feed.

Write your entry, stop, risk budget and planned quantity.

Explain why simulated past prices do not guarantee future results.

Submit your plan through the assigned coursework form.

Educational sample. No investment advice or real exchange execution.
